UrbanTrapeze™ is a patented product

2445 Midway Road  
Suite 103  
Carrollton, Texas 75006

## Get Connected with Ease!

Create an adjustable loop in steel cable with a compact, self-locking UrbanTrapeze™ and eliminate the need for crimps and ferrules.

UrbanTrapeze works with 7x7 uncoated galvanized steel cable. Available in two models: UT1.5 uses 1/16-inch cable while UT3.0 works with 1/8-inch cable. Both models are a reliable solution for suspending signs, aisle markers, lighting systems, sound systems, ceiling panels, fan units and HVAC ducting.

Simply feed the cable into the arrow-guided clutch where the built-in locking mechanism automatically grips the wire. Pressing the clutch button allows the cable to freely move back and forth for quick and easy height adjustments or to remove the device from the cable completely.

Manufactured in a sleek anodized aluminum finish, UrbanTrapeze is aesthetically attractive, as compared to competitive products, and perfect for applications in retail display, manufacturing, conference or event environments.

Complete your installation with the greatest of ease ... use UrbanTrapeze.

Item	Holding Power	Break Strength	Cable Type
UrbanTrapeze 1.5*	44 lbs each UT	220 lbs	1/16" uncoated 7x7
UrbanTrapeze 3.0†	198 lbs each UT	990 lbs	1/8" uncoated 7x7

UrbanTrapeze™ is a patented product. Use only 7x7 constructed uncoated cable with the UrbanTrapeze.  
 \*Available in anodized aluminum; black available as custom order.  
 †UrbanTrapeze 3.0 is a custom order product available in silver or black.
